These circuit-breakers are capable of breaking short-circuit currents up to 20kA in 1500V DC voltage applications. Widely used in the main circuits of combiner boxes, DC cabinets, and inverter cabinets, ...

High-performance DC 1500V/1000V solar circuit breaker with 250A capacity, offering robust protection and reliability for PV systems and DC power setups.

With a rated current range of 280A to 315A and a voltage capacity of up to 1500V, it is ideal for solar PV and wind power applications. Its thermal-magnetic trip unit ensures precise overload and short-circuit ...

Eaton DC molded case breakers (MCCB) are ideal for 600-1000 VDC applications such as energy storage, solar systems, transportation, and industrial DC circuits.

With a rated current range of 400A to 630A and a voltage capacity of up to 1500V, it is ideal for large-scale solar PV and wind power installations. Its thermal-magnetic trip unit ensures precise protection ...

BCP consist of DC Main Circuit (Blue box) and Control Power Circuit of Battery Rack (BPU*, BMS* - Red box). * There is no Control Operation in BCP itself.

Our DC MCCB product line covers voltage up to 1500V DC, which provides reliable overcurrent protection for solar installations ranging from residential rooftops to utility-scale power plants.

High breaking capacity, up to 8kA. No positive and negative poles, can be reversed, easy to connect. Rated working current to 125A. Opening distance > 9mm, quickly cut off the arc. Labyrinth arc interrupter.

The BB2-40 by BENY New Energy, a CE certified DC Mini Circuit Breaker, ensures safe solar systems with 1500V 40A capacity and arc flash barriers.

The BB2-40 by BENY New Energy, a CE certified DC Mini Circuit ...

1500v microgrid DC circuit breaker

Features reliable trip mechanisms and a high DC breaking capacity (Icu) specifically rated for 1500V, ensuring safe interruption of potentially large fault currents in extensive solar arrays.
