-----  
What is a chx200 rack CDU?

Design your solution with CoolIT today. The CHx200 rack CDU delivers 200kW cooling in 4U space with warm water compatibility, redundancy, and efficient performance for HPC and enterprise.

What is rackchiller CHX - cooling distribution unit (CDU)?

RackChiller CHx - Cooling Distribution Unit (CDU) can manage 200kW+ of heat load in a remarkably compact 4U form factor. CHx was designed to be installed and operate in demanding data center environments while offering a feature set customers require.

How does power density affect a data center?

Power density depends on server type, workload, and cooling efficiency. Colocation providers set power limits based on their electrical and cooling capacity. Higher-density racks allow businesses to use fewer racks, reducing costs and space. Data centers also track Power Usage Effectiveness (PUE) to measure energy efficiency.

How many servers can a CDU fit in a server rack?

This CDU combined with DCX Liquid Distribution Manifolds can be integrated into all standard server racks providing the exact, optimal cooling performance that your servers need, keeping your operation environmentally sustainable. Up to 150 servers or 2 server racks per one CDU!

ORV3 RACK & POWER SYSTEM SOLUTIONS Legrand's OCP ORV3 Rack & Power System is built for high-density, high-performance data centers, especially those supporting AI, HPC, ...

GRC (Green Revolution Cooling) has launched a new immersion cooling design for extreme-density computing that can support up to 200 kilowatts (kW) of server capacity.

Learn how kW per rack impacts colocation pricing, energy efficiency, and performance. Discover best practices to manage power, reduce costs, and future-proof your IT infrastructure.

DCX HYDRO CDU 2 is a rack-based Coolant Distribution Unit designed to cool individual high-density server racks. This compact 4U CDU is equipped with unique immersion pumps and ...

800VDC distribution High-voltage power conversion is the heart of future AI data center power delivery architectures. Technologies such as gallium nitride (GaN) enable power density and ...

1. Understanding Why High-Density Rack Lighting Needs a Rethink In data centers running 100kW+ racks, lighting isn't just about visibility--it's about survival. LEDs overheat. Shadows ...

Fremont, California Apr 24, 2025 (Issuewire ) - DeepCoolAI, a leading innovator in liquid cooling solutions for AI and high-performance computing (HPC) data centers, is proud to introduce the ORV3 ...

RackChiller CHx - Cooling Distribution Unit (CDU) can manage 200kW+ of heat load in a remarkably compact 4U form factor. CHx was designed to be installed and operate in demanding ...

The CHx200 rack CDU delivers 200kW cooling in 4U space with warm water compatibility, redundancy, and efficient performance for HPC and enterprise.
