Since 1983, developing the free Unix style operating system GNU, so that computer users can have the freedom to share and improve the software they use.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to ...

Basic questions about the GNU Project, the Free Software Foundation, and its licenses What does "GPL" stand for? Does free software mean using the GPL? Why should I use the GNU ...

Although most of the GNU Project's output is technical in nature, it was launched as a social, ethical, and political initiative. As well as producing software and licenses, the GNU Project has published a ...
