-----

Need an adaptable process meter? The SGD 24-M420 has a 4-20mA input, alarm output, and 2.4" TFT touchscreen. Customize with the free PanelPilot M Software.

The Microframe 4-20mA display is designed to accept industry-standard 4-20mA input signals, allowing you to view scaled values based on your personalized settings, easily configured through a web ...

Mouser offers inventory, pricing, & datasheets for 4 mA to 20 mA Digital Panel Meters.

STR551 OLED panel meter with Modbus, 4-20mA retransmission, and relay outputs. Supports multiple sensor types.

The TR-202 is a compact device used to convert 4...20mA signal (2 wire) of the transmitters in Relay (SPDT). It can be easily configured to control or detection level (Min and Max).

The CMCP730D Universal Signal Conditioner and Relay Module accepts an input from any DC Voltage, Current, RTD or Thermocouple and provides two levels of alarm and a 4-20mA or voltage output for ...

Digital panel meter/controller with 4x 4-20mA inputs. 6 digit display. 24V DC excitation plus optional relay output, analog output and serial comms.

Rii ai DC 0-10V 0/4-20mA Current Voltage Signal Generator, Built-in Battery Power Supply Interface Analog Simulator, Adjustable 4-Digit Display, for PLC, Panel Debugging, Device Testing

ProVu meters can be equipped with up to four internal relays, a 4-20 mA output and Modbus®; RTU serial communications. The PD6000 includes a 24 VDC power supply to drive the transmitter and ...

MAGNA Series Process Input Large Digit Displays can be scaled for popular industrial process signals, such as 4-20 mA, 0-20 mA or 0-10V, Sealed to NEMA-4, Programmable from front panel, Optional ...
