---

The unit can operate reliably in harsh environments such as low temperature, high temperature, high salt and high humidity, thunderstorm weather, high altitude and sandstorm, thus ensuring the safety ...

In summary, the 8kw storage liquid cooling unit, as a new type of equipment choice for battery thermal management, has shown significant advantages in terms of cooling effect, energy consumption, ...

8KW DC liquid cooled unit Integrated design, saving on-site installation and commissioning costs; Standard CAN communication interface; High-voltage DC power supply, meeting the voltage range ...

The In-Rack Air-to-Liquid Coolant Distribution Unit (CDU) series pushes rack-level thermal performance beyond conventional limits with a disruptive dual-mode cooling architecture.

Designed as an independent and modular system, Guchen's 8kW battery thermal management system (BTMS) is specifically developed for power battery packs that require up to 8kW of cooling capacity.

It is suitable for cooling and heating energy storage batteries, as well as other temperature-sensitive equipment. This model, with functions including host computer communication and alarm, is highly ...

8kW Vertical Liquid-Cooled Energy Storage Air Conditioner Designed for thermal management of energy storage systems, ensuring optimal operation of battery packs in high-temperature or extreme ...

Recently, Cooltec successfully delivered a batch of customized 8kW liquid cooling air conditioners to a U.S. energy storage client, supporting their 215WMH commercial and industrial (C& I) energy storage ...

Directly powered by the battery, this liquid cooling solution eliminates AC input, reducing energy loss and maximizing battery capacity. Advanced liquid cooling ensures optimal temperatures for high ...
