-----

An expert on electronic and photonic integrated circuits, Ali Hajimiri is investigating how to collect solar power in space -- and transmit the energy wirelessly to Earth.

In our STEO forecast, utility-scale solar is the fastest-growing source of electricity generation in the United States, increasing from 290 BkWh in 2025 to 424 BkWh by 2027. Almost 70 ...

Located 35 kilometers from Abu Dhabi city, the landmark solar plant was built in a single phase and generates enough electricity to power almost 200,000 homes, displacing 2.4 million ...

What follows are the top 10 solar power plants that are actually operational and verifiably producing power as of 2025. No speculative or half-built megaprojects and planned expansions. ...

Support the design review process for renewable energy power generation projects, focusing on Solar PV, or Battery Energy Storage. Coordinate the design review team and collaborate closely...

The most exciting possibility for solar energy is satellite power station that will be transmitting electrical energy from the solar panels in space to Earth via microwave beams.

SEIA makes major solar project data available to the public through the map below. SEIA members have exclusive access to the list as a sortable, searchable MS Excel file that is updated monthly.

The project achieved one of the most competitive tariffs for solar power in the world at USD 1.32 per kWh. During development, a record-breaking 10MW of solar panels were installed on average per day.

On a cool, clear evening in May 2023, Caltech electrical engineer Ali Hajimiri and four members of his lab gathered on the roof of the Gordon and Betty Moore Laboratory of Engineering to ...
