You do not need a special charger to charge your Lithium Iron Phosphate (LFP) deep cycle battery. The BB battery prefers to bulk charge at 14.4 volts and float at 13.6 volts.

All of our batteries have a built in battery management system to protect against fault conditions. We also only use LiFePO4 cells, which are the most stable and safe types of lithium cells.

The batteries come standard with a flag style terminal post with a 3/8" hole to accommodate a 5/16" bolt and lug sizes up to 2 AWT. Larger lugs may require a 1/4" bolt. All ...

o Only purchase lithium batteries that have a Battery Management System built in. o Choose a supplier that only sources cells from UL manufacturing sources. o Confirm that your new battery bank can ...

These are updated charging parameters for Battle Born LFP (LiFePO4) batteries and tips for restoring and maintaining Battle Born batteries.

Our team of dedicated engineers and battery experts are always just a phone call away to answer your questions and make your switch to lithium seamless. We're here to help you understand how our ...

Are Battle Born Lithium (LiFePO4) batteries superior to AGM batteries for electrical system of campervans, RV, boats, etc? To find out, we replaced the battery bank of our campervan ...

Our batteries do not emit any fumes or gases, so you can mount them in any orientation that is suitable for you. Do NOT reverse the polarity of the battery, as this will damage both the battery and the ...

The most popular battle born product is the 12V 100Ah LiFePO4 deep cycle battery: This battery has a 100Ah continuous current, and a 200Ah surge current (up to 30 seconds). There is ...

The SOK battery is 0.71 cubic feet and weighs 73 pounds, while the Battle Born battery is 1.23 cubic feet, and

Battle born battery size

weighs 80.8 pounds. The SOK battery has a more standard cuboid shape, but ...
