Discover the booming Behind-the-Meter Energy Storage System market! Explore a detailed analysis revealing a 23% CAGR, key drivers, market segmentation (residential, commercial, ...

This report was prepared by Dunsky Energy + Climate for the Canadian Renewable Energy Association. The project team expresses gratitude to CanREA members who provided crucial insights and data in ...

The Behind the Meter (BTM) Market focuses on energy storage systems installed on the customer side of the electricity meter to optimize energy consumption, reduce grid dependency, and ...

Within Canada, all energy storage projects currently under construction are BESS. Proposed and under-construction projects have a power range between 1 MW and 411 MW, with an ...

The global behind-the-meter energy storage market is primarily driven by the rising demand for decentralized energy solutions and increasing consumer focus on energy independence and cost ...

Battery Energy Storage Systems (BESS) in both FTM and BTM are being adopted at an accelerated rate due to a number of challenges within the electric market and the utility grid.

Regulatory reforms around energy arbitrage, ancillary services, and time-of-use pricing are creating favorable revenue models for battery energy storage operators in Canada.

Energy storage systems (ESSs) can help make the most of the opportunities and mitigate the potential challenges. Hence, the installed capacity of ESSs is rapidly increasing, both in front-of ...

Applications of BTM energy storage systems span across various industries, including residential, commercial, and industrial sectors. In the residential sector, homeowners utilize these systems to ...

Behind-the-meter energy storage prices in Canada

As per our latest research, the global Behind-the-Meter (BTM) Energy Storage market size reached USD 7.2 billion in 2024, reflecting robust adoption across key sectors. The market is expected to ...
