Learn how GE Vernova's island and microgrid solutions have helped provide reliable power solutions in the Caribbean, Latin America, and more regions across the globe.

"We develop flexible and scalable microgrid solutions for diverse applications, enabling the energy transition in off-grid and remote regions. By fostering local service teams and forming global ...

The project features MIT (Made In Taiwan) renewable energy technologies, including Billion's Fusio series BESS, Giga series PV inverters, and an AI-driven EMS (Energy Management ...

The project is expected to cut carbon emissions by 800 metric tons annually, with over 50% renewable energy self-sufficiency at aquaculture centers and demonstration farms.

Taiwan-based Billion Electric Group has successfully implemented advanced solar-plus-storage microgrid systems across Palau, Tuvalu, and the Marshall Islands. These installations aim to ...

"We develop flexible and scalable microgrid solutions for diverse applications, enabling the energy transition in off-grid and remote regions. By fostering local service teams and forming ...

By leveraging hybrid power solutions, energy storage batteries, and energy control systems, islands can achieve energy independence and sustainability. This article delves into the ...

In our first case study, we explore an island microgrid project that transcends these issues by creating a harmonized system of photovoltaics, energy storage, and diesel generators.

Imagine a tropical island where microgrid development determines whether hospitals can refrigerate vaccines or schools can power computers. Despite 634 million people globally living on ...

Billion Electric Group is leading the charge toward sustainable energy solutions in the Pacific Islands with its

Beilong Island Microgrid Project

innovative deployment of smart solar-storage microgrids.
