Does Bhutan need long-term energy security?

With growing demand, where the peak power demand has outpaced firm power supply by 125% in 2024 which is expected to increase further, securing the country's long-term energy security has become ever more a priority. For Bhutan, long-term energy security means meeting winter demands when our hydropower generation ebbs to the lowest.

What are the requirements for land acquisition & leasing in Bhutan?

The land acquisition and leasing shall be carried out in accordance with the Land Act of Bhutan 2007 and its regulations and guidelines, as may be amended from time to time. 8.2 In case of the private land required for Renewable Energy project, the DoE will facilitate its acquisition and conversion to SRF.

What is Bhutan's hydropower potential?

1.3 Bhutan is endowed with huge hydropower potential together with solar, wind and biomass resources. The techno-economically viable hydropower potential is 33,000 MW from 90 sites as per the Power System Master Plan 2040 (PSMP), where these sites are mostly located outside of the ecological parks and the biological corridors.

Is Bhutan a green country?

1.5 Bhutan's electricity is 100% green and renewable, primarily generated from hydropower with an installed capacity of 3,490 MW as of June 2025, representing 11% of country's techno-economic potential. The production from solar and wind sources is about 6 MW. 1.6 Bhutan is carbon negative and has committed to remain carbon neutral.
