Is Blue Sky Solar a local company?

Despite the Springfield, Oregon storefront, Blue Sky Solar is not a local company. They are based in Utah and contract out for everything, not always to Oregon companies. We began the process for panels and battery storage in early March of 2022. It is now May of 2023. All seemed wonderful at first. It became one thing after another.

When does Blue Sky Solar get a PTO?

Under new federal law, your system must be installed and fully approved (PTO) by year-end. Blue Sky Solar must receive your contract by Sept. 15, 2025 to guarantee installation. Act now to lock in your savings before it's too late! All of our systems are designed by a NABCEP certified professional to ensure your system is optimally designed.

Who can build my solar system?

Pick someone else to build your solar system. Blue Sky Solar is currently working in the Utah, Oregon, and Washington market area, offering high end solar options for very competitive pricing. We believe in owning solar power, not leasing it. For years buying solar was expensive, but those days are over!

Company profile for installer Jiangsu Blue Sky PV Technology Co., Ltd. - showing the company's contact details and types of installation undertaken.
