In this study, an evaluation framework for retrofitting traditional electric vehicle charging stations (EVCSs) into photovoltaic-energy storage-integrated charging stations (PV-ES-I CSs) to improve green and low-carbon ...

The project is the first utility-scale Battery Energy Storage System in Bulgaria as well as one of the first of such scale in Eastern Europe. The 25MW/55 MWh BESS supports a 33 MWp PV plant equipped ...

The Bidirectional Charging project, which began in May 2019, aimed to develop an intelligent bidirectional charging management system and associated EV components to ...

In 2024, GSL ENERGY successfully installed a 7.45MWh industrial-grade BESS energy storage battery system in Bulgaria, integrated with solar photovoltaic power generation, to provide stable and clean ...

Sunpal Power, a global leader in high-performance solar photovoltaic systems, proudly showcases its latest project: a 500kW hybrid energy storage system installed in Bulgaria.

SCU's first 40ft energy storage container project in Bulgaria is not only a successful practice of technological innovation but also an important milestone in SCU's globalization strategy.

Summary: Explore how Bulgarian enterprises are integrating photovoltaic power generation with advanced energy storage pumps to achieve energy independence. This article examines industry trends, cost-saving ...

The integrated PV storage system combines PV controller and bi-directional converter for "light + energy storage". Its modular design allows flexible PV, battery, and load configuration.

Bulgarian smart photovoltaic energy storage container used for bidirectional charging at airport

Join us as we dive into a case study of this Bulgarian project which has set a new benchmark for deployment speed and explore the technologies which made it possible.

The stackable BESS innovation could offer large-scale energy storage in commercial areas and would offer smaller installation companies a foothold in the large-scale business.
