I bought an open battery mounting box from one of the stock car parts vendors, I can't recall the name now. I installed 1/4" threaded inserts in the rear cross member to mount the battery box.

Before installing batteries into the cabinet, carefully remove all items from inside the cabinet and lay it on its back, preferably on a clean surface or a furniture blanket.

The easiest is to use one of those battery relocation kits, bolt it to the bottom of the box, and fit the battery into it. Then put something over it to cover it, and be sure to vent it to the outside.

What I did on my 86 is use a dremel with a grinder tip and make the ring connectors big enough so that my battery bolts would fit through. This way I can leave it connected all the time.
