Whether you're moving new electric vehicles by ocean, shipping lithium batteries by air, or storing components in between, we simplify complex battery logistics.

To ship or import batteries internationally by air, Part 12 of the TDG Regulations requires that you comply with the ICAO Technical Instructions and additional requirements under the TDG Regulations.

However, batteries having some other defective feature (e.g., batteries with the incorrect model number on the label or batteries not holding enough charge) can still be shipped by air with proper ...

These high-capacity devices demand strict adherence to international regulations, specialized packaging, and safety protocols. This guide breaks down the critical shipping standards you need to ...

You can safely and easily ship most consumer-type lithium batteries, both rechargeable and non-rechargeable varieties, if certain precautions are taken to prevent short circuits, overheating, and ...

Air transport offers speed, but shipping energy storage systems (ESS) and lithium batteries by air is subject to the strictest global safety regulations.

IUMI strongly supports the SoC limit of 30% for air freight and advocates similar principles for maritime transport. Regulations depend on battery size and packing method.

When you're shipping lithium-ion batteries by air, it's essential to follow specific regulations regarding their state of charge (SoC). The SoC, which reflects the battery's charge level ...

From 1 January 2026, lithium-ion batteries that are packed with equipment and vehicles powered by lithium ion or sodium ion batteries must be offered for air transport with the battery at a reduced state ...

Can energy storage batteries be shipped directly to kosovo by air

Shipping batteries--especially lithium batteries--requires strict compliance with international transport regulations. Whether you are shipping by sea or by air, understanding the ...
