Self-contained and incredibly easy to deploy, they use proven vanadium redox flow technology to store energy in an aqueous solution that never degrades, even under continuous maximum power and ...

But this 16,000-square-foot cleantech factory is complete, and it's generating a shocking number of vanadium flow batteries (VFBs): enough to power 3,300 electric vehicles a year.

The event highlighted the role of Invinity's vanadium flow batteries in supporting British Columbia's economy, diversifying export markets, and creating local jobs.

Invinity Energy Systems is pleased to announce that the Company's Canadian partner Elemental Energy has officially commenced operation of its 8.4 MWh Invinity VS3 vanadium flow ...

Market entry is facilitated by favorable regulatory policies and incentives aimed at promoting energy storage deployment, positioning Canada as a strategic hub for vanadium-based ...

Invinity Energy Systems specializes in vanadium flow batteries for large-scale energy storage. Invinity hosted officials to showcase their batteries' role in Canada's clean energy growth.

VanadiumCorp Resource Inc. seeks to produce a reliable stream of high-quality vanadium electrolytes for the expanding international market for long-duration Vanadium Flow Batteries (VFB).

It is the only vanadium flow battery deployed at scale in Canada, with a storage capacity of 8.4 megawatts of solar power serving the electricity needs of 7,000 Albertans.

Invinity Energy Systems, for example, built a new manufacturing facility in Vancouver a year and a half ago. The company makes vanadium flow batteries used for utility-scale storage.
