U.S. President Jimmy Carter speaking in front of Solar Panels placed on West Wing Roof of White House, announcing his solar energy policy, June 20, 1979.

Nearly 40 years after President Carter had 32 solar panels installed on the White House's roof, he watched nearly 4,000 of them go up in his hometown of Plains, Georgia, in 2017. ...

In 1979, President Jimmy Carter installed solar panels on the roof of the White House. Amid an energy crisis, Carter hoped to reduce the country's dependence on foreign oil. President...

That day, June 20, 1979, was clear enough for the sun to bring out a bright reflection on the panels, and for shadows of those on the roof to be drawn dark and tight around them. For ...

President Jimmy Carter installed 32 solar panels on the presidential mansion amid the Arab oil embargo, which had caused a national energy crisis.

In response to the economic crisis created by the Arab oil embargo and the nation's growing dependence on foreign oil, President Jimmy Carter called for a comprehensive campaign to ...

It was a novel idea at the time, but one that made sense: In 1979, President Jimmy Carter had 32 solar panels installed on the roof of the White House. They were removed just seven years later, under ...

In 1979, President Carter had an array of 32 solar thermal panels installed atop the West Wing.

The need for alternative sources of energy and a desire for energy independence prompted President Jimmy Carter to install the first solar panels on the roof of the White House in 1979.

Jimmy Carter 's reviewing stand for his inauguration was warmed by solar panels. [1] The Carter administration increased the budget for the development of energy technology research and ...
