US-based independent power producer, Silicon Ranch has partnered with Central Electric Power Cooperative to build a 100 MW solar farm in Orangeburg County, South Carolina, to ...

Learn the basics of how concentrating solar-thermal power (CSP) works with these resources from the DOE Solar Energy Technologies Office.

Meta's commitment will support Silicon Ranch's investment in the Orangeburg County solar farm, adding a new energy generation resource to the fast-growing statewide electric ...

This paper presents a historical review of CR-CSP solar tower projects worldwide, emphasizing key technological milestones, deployment trends, and innovation phases from early ...

The Crescent Dunes central tower solar power plant, located in the Nevada desert, is a milestone in solar energy as the world's largest plant of its kind and the first in the United States.

Silicon Ranch, Central Electric Power and Meta are developing a 100 MW solar farm in Orangeburg County, South Carolina for a data center.

Central tower solar power plants fall into the category of concentrated solar systems. They concentrate solar radiation from a huge area into a very small space on top of a tower. To achieve that, they use ...

By linking Silicon Ranch's development and operational expertise, Central Electric's distribution network, and Meta's renewable energy commitments, the initiative highlights how collaborative partnerships ...

The four dry-cooled systems were the three power plants at the Ivanpah Solar Power Facility near Barstow, California, and the Genesis Solar Energy Project in Riverside County, California.

OverviewEnvironmental effectsComparison between CSP and other electricity sourcesHistoryCurrent

Central Solar Power Project

technologyCSP with thermal energy storageDeployment around the worldCostCSP has a number of environmental impacts, particularly by the use of water and land. Water is generally used for cooling and to clean mirrors. Some projects are looking into various approaches to reduce the water and cleaning agents used, including the use of barriers, non-stick coatings on mirrors, water misting systems, and others. Concentrating solar power plants with wet-cooling systems have the highest water-c...

Concentrating solar power (CSP) projects in United States are listed below alphabetical by project name. You can browse a project profile by clicking on the project name. You can also access ...
