Input to output voltage step down factor will be relatively small to allow for lower input impedance, for example, 600V AC to 480V AC, 480V AC to 400V AC etc but not from medium voltages to 3-phase rated voltage.

Exposing the ChargePoint charging components to over 406 mm (16 in) of standing water could create an electrocution, shock, or fire hazard. Cut power to the charging station if it has been exposed to standing ...

View the Express Plus technical resources. The most complete DC fast charging platform, Express Plus is for every stage of fleet electrification with its modular system and unmatched support service.

When it comes to technical specifications, the ChargePoint Flex can charge up to 42 miles per hour (tested on the Tesla Model Y Performance 2020) with a 240V plug-in connection. The Flex offers a maximum power ...

Read and follow all warnings and instructions before servicing, installing, or operating the ChargePoint®; charging station. Install and operate only as instructed. Failure to do so may lead to death, injury, or property ...

Express Max output power 62.5 kW Max output current 156 A Output voltage, charging 200V - 1000V

Software & Services and support experience. ChargePoint also offers various support plans such as ChargePoint Assure.®; Learn more at

ChargePoint Express stations can deliver up to 62.5 kW of power, which can add hundreds of miles of range to an EV in under 30 minutes. Some newer models, like the Express Plus, can deliver up to 500 kW, ...

View the full spec sheet for the ChargePoint Express 280 DC fast charging station for businesses.

Power Select allows stations to be installed and configured for current lower than the maximum 80A. Power

Chargepoint max voltage

Select current options include 16A, 24A, 32A, 40A, 48A, 50A, 56A, 64A, and 72A.
