There's a few reasons this can happen. This video explains everything you need to know about base power in Dune: Awakening.

The preferred source that wind power may replace on the grid is hydro power, which is already carbon dioxide free. If a conventional source is replaced, it may simply be ramped down or switched from ...

How Does The Electrical Grid Work?What Is The Difference Between Base and Peak load?Are Base and Peak Loads Provided Differently?How Does Wind Power Affect Base load?How Does Wind Power Affect Peak load?What Are The Sources of Electricity in The Us?Why Don"T We Use More Hydro Power?How Much of Our Electricity Use Is Residential?Why Is The Intermittency of Wind An Important Issue?Is There A Difference Between Intermittency and Variability?Wind power has no effect on base load. However, since base load providers can not be ramped down, if wind turbines produce power when there is no or little peak load, the extra electricity has to be dumped (e.g., into the ground) or the wind turbines turned off ("curtailment").See more on wind-watch .b_imgcap_alttitle p strong,.b_imgcap_alttitle .b_factrow strong{color:#767676}#b_results
