-----

Building on an approach consolidated over many years in Italy, this milestone marks a key step in Limes' international expansion and its contribution to Chile's long-term energy transition. ...

Chile has emerged as a world leader in hybrid systems and standalone energy storage since implementing its Renewable Energy Storage and Electromobility Act in 2022.

Utility AES Andes has started construction on two renewable energy projects in Chile, with a combined 1.3GW of capacity. Located in the northern region of Antofagasta, the Pampas and ...

A Spanish independent power producer has energized the fourth phase of its flagship solar-plus-storage project in Chile, Oasis de Atacama, according to a report from PV Tech. Dubbed ...

Chile is rapidly moving to build more power generation capacity, with much of that effort focused on renewable energy resources and battery energy storage systems (BESS).

Australia-based power producer Pacific Hydro has secured environmental approval for a 190.7-MWp solar project with a 200-MW battery energy storage system (BESS) in Chile, the ...

The Faro del Sur project, developed by HIF Global, will install 372 MW of wind capacity in southern Chile, supplying clean electricity to large-scale e-fuels production and reinforcing ...

Limes Renewable Energy, a global developer specialising in solar, wind, and battery energy storage systems (BESS) projects, has secured the environmental qualification resolution ...

November 24, 2025 - Enel Chile, through its subsidiary Enel Green Power Chile, has initiated construction of the Las Salinas battery energy storage system (BESS), part of an industrial-scale ...

# Chile Wind Solar and Energy Storage Project

The \$1.3 billion hybrid facility would combine 1,004 MWp of solar PV, 152 MW of wind generation, and a battery energy storage system (BESS) with 3,831.4 MWh of capacity.
