As Moscow's isolation from the West deepens and Beijing's great power competition with Washington intensifies, China and Russia have forged an increasingly consequential partnership that ...

China's development of batteries and other clean energy technologies will ultimately constrain Russia's hydrocarbon complex, complicating ties.

China is installing more renewables than any other economy, but that rollout is not without its challenges. How China overcomes market, financing and systemic challenges holds lessons for ...

The growth of solar power industries worldwide has been rapidly accelerated by the growth of the solar market in China. Chinese-produced photovoltaic cells have made the construction of new solar ...

A Reuters review of various sites on the ground suggests that where many of Russia's most recent promises have fizzled, China has discreetly stepped up to fill the void, pushing ahead ...

Renewable energy in China is surging, with follow on effects that impact the entire world community on the way to the future.

The continent imported 60% more solar panels from China over the past year, though a lack of reliable installation data makes it a challenge to track the true pace of deployment.

Chinese solar panel exports to the EU have soared as the bloc pivots from Russian fuels. Europe relied on cheap Russian energy for decades. And Russia was happy to supply low-cost oil and...

U.S. President Donald Trump may have spurned solar power, but that has done little to slow the solar revolution that is sweeping nearly every other corner of the world, from Pakistan to Chile.

China is the dominant force in next-generation energy technologies today. It's pouring hundreds of billions of

China Solar Power Russia

dollars into putting renewable sources like wind and solar on its grid,...
