**Report Summary:** The "Latin America Energy Storage Outlook 2025" explores the Latin American energy storage market across the utility-scale, C& I, and residential segments.

Battery energy storage systems (BESS) are rapidly transforming Latin America's (LATAM's) energy landscape. As countries across the region pursue clean energy goals, improve ...

Despite Chile's pipeline of nearly 8 GW in battery energy storage ...

A lack of regulation and policy regarding BESS is challenging the growth of the technology in Latin America and the Caribbean.

Energy storage installations are being driven by wider penetration of renewable energy and related grid limitations. Chile, Brazil, and Mexico are among countries leading the way for energy ...

Despite Chile's pipeline of nearly 8 GW in battery energy storage systems (BESS), a potential flattening of its duck curve and increased interconnection delays could lead to less ...

Driven by the aggressive adoption of renewable energy sources and underpinned by increasingly supportive government policies, Latin America is rapidly transforming from a peripheral ...

Latin America and the Caribbean are moving toward more intelligent, sustainable, and resilient energy systems, with battery storage emerging as a key enabler for integrating renewable energy, reducing ...

Li-ion battery energy storage cabinets are critical for balancing supply and demand, enabling grid stability, and maximizing renewable utilization. This trend is driven by government...
