After an earthquake, there may be unpredictable aftershocks, landslides and fires. Aftershocks may occur immediately after the earthquake or after days, weeks or even months. Follow instructions from ...

Shipping container houses are becoming increasingly considered for earthquake-prone areas due to their structural characteristics. They are fabricated from steel, possess inherent ...

Among the most innovative developments in this field is the advanced solar powered shipping container. This solution combines solar power technology with the durability and mobility of ...

An earthquake is a violent and abrupt shaking of the ground, caused by movement between tectonic plates along a fault line in the earth's crust. Earthquakes can result in the ground ...

A community struggling, yet unbroken & WHO's people centered response The hardships these individuals face reflect the wider struggles of millions displaced by the earthquake. Safe water, ...

This article examines the role of solar containers in earthquake response, their deployment benefits, and field deployments of how they provide clean and reliable power when it's needed.

A 7.3 magnitude earthquake struck Port Vila on 17 December 2024, claimed 14 lives, destroyed critical infrastructure, and displaced over 2000 people who needed to stay in evacuation ...

Disaster solar containers deliver clean, reliable emergency power in under 2 hours, offering rapid, fuel-free deployment for disaster relief.

Working closely with the government and partners, WHO is supporting to respond to the urgent health needs

Earthquake-resistant shipping containers used on construction sites in Serbia

of the affected populationA 6.4 magnitude earthquake hit Nepal's Western ...

On 6 February 2023, a series of large earthquakes hit southern Türkiye and northern Syria, followed by hundreds of aftershocks. Thousands of lives were lost in the initial earthquakes and thousands more ...

In this informative video, we discuss the resilience of shipping containers against natural forces, particularly earthquakes. We will examine the construction materials and design features...

Sagaing earthquake in Myanmar On 28 March 2025, two powerful earthquakes struck central Myanmar's Sagaing Region near Mandalay. The first, with a magnitude of 7.7, occurred at ...

Solar panel kits specifically designed for shipping containers are available in the market for seamless and hassle-free installations. These kits include all the necessary components for a complete solar ...

Learn how to ensure seismic safety for shipping container structures. Discover building codes, earthquake-resistant designs, anchoring methods, and case studies to protect your container home ...

Discover how Higher Wire shipping container solar systems provide reliable, off-grid power for remote worksites and projects.

Explore solar-powered shipping containers, sustainable and portable energy solutions for eco-friendly logistics.
