At the MIT Energy Initiative's Annual Research Conference, industry leaders agreed collaboration is key to advancing critical technologies amidst a changing energy landscape.

A look at how AI can be used to help support the clean energy transition by helping to manage power grid operations, plan infrastructure investments, guide the development of novel ...

For more information about the Sahrawi NDC, or about climate change, climate justice and Western Sahara, please contact Mr Saleh Brahim of the Sahrawi Ministry of Environment and Water ...

MIT Energy Initiative researchers calculated the economic and environmental impact of future ammonia energy production and trade pathways.

In MIT course 15.366 (Climate and Energy Ventures) student teams select a technology and determine the best path for its commercialization in the energy sector.

New research emphasizes the importance of well-validated models and forecasting tools in evaluating choices for investments in clean energy technologies and policies by governments and ...

"Implementing a solar microgrid energy storage system has improved our energy independence and sustainability, ensuring uninterrupted power supply throughout the day."

The MIT-GE Vernova Climate and Energy Alliance, a five-year collaboration between MIT and GE Vernova, aims to accelerate the energy transition and scale new innovations.

MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an advance that could dramatically reduce the amount of energy needed for crude oil ...

Liquid air energy storage could be the lowest-cost solution for ensuring a reliable power supply on a future grid dominated by carbon-free yet intermittent energy sources, according to a new ...

Our work is centered on advancing the foundational elements of sustainable energy storage and recycling, with a primary emphasis on three key disciplines: EV Battery Recycling, Bio-energy ...

On a global level, success for the Sahrawi Arab Democratic Republic people could also mean forging stronger alliances with other countries, such as the European Union, for their self-declared ...

Unlocking its secrets could thus enable advances in efficient energy production, electronics cooling, water desalination, medical diagnostics, and more. "Boiling is important for ...

The government of the Sahrawi Arab Democratic Republic (SADR) is committed to the goals set out in the Paris Agreement of limiting global heating to well below 2°C above pre-industrial

MIT News explores the environmental and sustainability implications of generative AI technologies and applications.

A delegation from the African Union's Commission for Political Affairs, Peace & Security began a visit to the Sahrawi refugee camps on Sunday as part of a multi-day working visit..
