Spearheaded by the African Development Bank (AfDB), this ambitious project aims to turn the vast desert landscape into a renewable energy powerhouse, with a goal of generating 10 ...

The Government of Eritrea has embarked on project to provide modern, affordable and sustainable energy to previously off-grid villages and rural towns of Areza and Maidma in Debub region.

The project is expected to provide improved energy access to more than 235,000 Eritreans, 20% of them women and youth. Beneficiaries will include residential households, small ...

A new scheme backed by the African Development Bank's Desert to Power initiative will fund new solar PV capacity, battery energy storage and diesel backup mini-grid systems in Eritrea, ...

This section outlines the national environmental and social policy framework governing the development of the Solar PV Hybrid Mini-Grid Project in Barentu, Eritrea.

Solarcentury has commissioned two solar-storage-diesel mini-grids in rural communities in Eritrea that are far away from the grid and have relied purely on diesel power until now.

In a landmark move toward sustainable energy, Eritrea is set to welcome its first solar photovoltaic energy storage plant, marking a significant step in the nation's renewable energy journey.

This comprehensive effort, one of Eritrea's key development projects, aims to broaden electricity access in rural areas and foster sustainable growth. The project is designed to deliver ...

Connected to the fully operational, 2.25 megawatt capacity solar photo-voltaic mini-grids there are 12 schools and 7 health institutions. This is the largest stand-alone operating energy solutions in Africa.
