What is the EU export value of solar panels?

By contrast, the EU export value of wind turbines (EUR2.8 billion) was much higher than the corresponding value for imports. The EU import value of solar panels decreased by 43% between 2023 and 2024 (see Figure 2), due to a drop in prices, even though the quantity imported slightly increased by +2%.

Does Europe have a trade policy for solar panels?

Europe has a trade policy for solar panels that is designed to level the playing field between Europe and countries like China. This column assesses the EU's stance. Antidumping policy is supposed to promote a fair competitive environment between domestic import-competing and foreign exporting firms.

Does Europe need a solar PV system?

Europe relies on solar photovoltaic (PV) as one of the main energy sources in its climate roadmap. Europe has been a pioneer and leader in PV production, and the installation targets are continually increasing via Renewable Energy Directive revisions.

What is the EU export value of solar panels & biofuels in 2024?

The EU import values of solar panels and liquid biofuels in 2024 were much higher than the corresponding EU export values which were EUR0.7 billion for solar panels and EUR1.8 billion for liquid biofuels. By contrast, the EU export value of wind turbines (EUR2.8 billion) was much higher than the corresponding value for imports.
