-----  
What is a fifth-generation LFP battery?

CATL's newly released fifth-generation LFP cells build on the performance advantages already demonstrated by its fourth-generation products, which deliver higher energy density, longer lifespan and greater power output than the industry's mainstream second- and third-generation LFP batteries.

Why is CATL launching a fifth-generation LFP battery?

CATL has started mass production of its fifth-generation LFP batteries, boosting energy density and cycle life, while advancing ternary and sodium-ion chemistries, solid-state R&D, and recycling to maintain its global power battery market lead.

What is a CATL 5th-gen LFP battery?

CATL 5th-gen LFP batteries mark a pivotal advancement in lithium iron phosphate technology, delivering unprecedented energy density improvements that directly challenge traditional automotive battery paradigms.

How much does a 5th generation LFP battery cost?

CATL's fifth-generation LFP batteries have achieved new breakthroughs in energy density and cycle life, according to its chairman Robin Zeng. (\$1 = RMB 7.0646)

Revolutionary Performance Metrics of Next-Generation LFP Technology Enhanced Energy Density Achievements CATL 5th-gen LFP batteries mark a pivotal advancement in lithium ...

Against this backdrop, storage companies have launched a new round of technology competition centred on next-generation storage cells. First, the race to define third-generation battery ...

Contemporary Ampere Technology Co Ltd (CATL) has started large-scale commercialization of its next-generation high-capacity battery cells for energy storage systems, after ...

CATL has started mass production of its fifth-generation LFP batteries, boosting energy density and cycle life, while advancing ternary and sodium-ion chemistries, solid-state R&D, and ...

Mass Production of Fifth-Generation LFP Batteries CATL has announced the transition to mass production of

## Fifth generation energy storage battery cells

its fifth-generation lithium iron phosphate (LFP) batteries. The new platform ...

CATL's 5th-gen sodium-ion battery triumphs over lithium's low-temperature weakness Chinese EV battery maker CATL's new LFP batteries deliver higher energy density and longer cycle life.

CATL has begun mass production of an LFP cell with higher energy density and fewer components for use in stationary energy storage systems.

CATL's fifth-generation LFP batteries entered mass production in November 2025, building upon the performance gains established by fourth-generation cells. The company's Naxtra sodium ...

CATL launches its 5th-gen sodium-ion battery delivering strong performance even in freezing temperatures, setting a new benchmark for cold-weather energy storage.

CATL (HKG: 3750, SHE: 300750) has commenced large-scale commercialization of its next-generation high-capacity battery cells for energy storage systems, following the product's ...
