Where is Germany's largest battery storage system located?

In March 2025, Germany's largest battery storage system - located in Bollingstedt, Schleswig-Holstein - was connected to the grid. It delivers 103.5 megawatts of power and has an energy capacity of 238 megawatt-hours. The expansion of electricity storage is a key component of Germany's energy transition.

Why does Germany need a battery storage system?

As the share of renewable energy in the power grid continues to grow, so does the need for efficient electricity storage. In 2024, battery storage systems in Germany grew by approximately 50 percent compared to the previous year.

How did battery storage grow in Germany in 2024?

In 2024, battery storage systems in Germany grew by approximately 50 percent compared to the previous year. In 2024, the number, output, and storage capacity of battery systems in Germany grew by around 50% compared to the previous year. At the beginning of January 2025, Germany reported a total of 18.2 GWh in stationary battery storage systems.

How much power does Germany have in a battery storage system?

At the beginning of January 2025, Germany reported a total of 18.2 GWh in stationary battery storage systems. Of this, 15.8 GWh came from home storage systems, 2.8 GWh from utility-scale storage, and 775 MWh from commercial storage.

Policy Large-scale energy storage gets a boost in Germany with surprise regulation support Germany is preparing to ease planning rules for battery, heat, and hydrogen storage ...

The growth in large-scale battery storage capacity is likely to rise significantly, up to fivefold in the next two years, BSW said. "Storage systems are the fastest, cheapest and most ...

One of Germany's strengths is regulatory clarity. Unlike many EU markets still debating definitions, Germany is moving toward a precise legal classification for long-duration storage assets.

Storage systems for different needs Battery storage systems in Germany serve a variety of purposes depending on their scale. Home storage systems are primarily used to maximise the use ...

# Germany Large Energy Storage

(Clean Energy Wire, 2 Oct 2024) The number of large-scale battery storage projects in Germany will increase rapidly over the next two years, the country's solar industry association BSW said. Around ...

According to Thomas Brandenburg, Managing Director of LEAG Clean Power GmbH, the facility will play a key role in optimizing existing grid infrastructure and balancing energy supply and ...

Share From ESS News German solar trade body BSW-Solar expects the capacity of large battery storage systems installed in Germany to increase fivefold by 2026.

How large-scale battery storage and flexible demand shape Germany's future power prices - insights from long-term Day-Ahead price scenarios.

Germany's grid-scale battery buildout hit a record year in 2025, with installed capacity now standing at 2.4 GW. But BESS additions come in slower than pipeline projections assumed, as grid connections ...

The storage sector grew by 50% in 2024, with 600,000 new systems installed, consolidating the country as a European leader in the energy transition. This growth is part of a ...
