Search all the announced and upcoming solar photovoltaic (PV) projects, bids, RFPs, ICBs, tenders, government contracts, and awards in Germany with our comprehensive online database.

The trade guide "Combining photovoltaics and electromobility sensibly", developed by the German Solar Association in the EU-funded project PV-Prosumers4Grid, points the way to practical implementation.

In building a sustainable energy future, photovoltaics is going to have an important role. The following summary consists of the most recent facts, figures and findings and shall assist in forming an overall ...

Far from being a sun-drenched country, Germany boasts one of the world's highest solar power outputs. The country triggered the large-scale launch of the technology with guaranteed feed-in tariffs in the ...

Constructed by Hansainvest Real Assets, the Witznitz Energy Park in Germany is claimed to be Europe's most expansive solar park, boasting an output of 650MW and featuring more than 1.1 ...

Germany's renewable energy growth relies on the success of major solar projects. Here are five developments that are driving this progress forward. 1. Verbund Visiolar Germany solar PV ...

Since 2004 solar power in Germany has been growing considerably due to the country's feed-in tariffs for renewable energy, which were introduced by the German Renewable Energy Sources Act, and ...

OverviewHistoryGovernmental policiesStatisticsCompaniesSee alsoExternal linksDuring the Reagan administration in the United States, oil prices decreased and the US removed most of its policies that supported its solar industry. Government subsidies were higher in Germany (as well as Japan), which prompted the solar industry supply chain to begin moving from the US to those countries. Germany was one of the first countries to deploy grid-scale PV power. In 2004, Germany was the first country, together with Japan, to reach 1 GW of cumulative installed PV capacity. Since 2004 solar pow...

Germany Solar Photovoltaic Power Generation Project

Here you can find the rating of the top biggest solar photovoltaic plants located in Germany. The list contains only megawatt-scale ground-mounted PV stations and parks connected to the power grid ...

Germany installed 16.2GW of solar PV in 2025, according to an analysis by the Fraunhofer Institute for Solar Energy Systems (ISE) and based on the energy-charts data platform.

Vattenfall has big plans for expansion on solar farms. The coming years, hundreds of megawatts of solar and batteries is to be installed annually. Not in the sunny south of Europe as one ...
