Does Australia have a battery energy storage subsidy?

According to the Department of Energy's official guide, Australians can access a wide range of battery energy storage subsidy programs at both federal and state levels in 2025. What Is the Battery Energy Storage Subsidy?

How much are Australian government subsidies for coal & gas industries?

In 2023-24, subsidies for coal and gas industries from all Australian federal and state/territory governments was estimated to be \$14.5 billion which was an increase of 30% from the previous year 15,16. Navigating the landscape of government subsidies for energy industries reveals a complex and often murky picture.

Are battery storage incentives a good idea in Australia?

The Australian government is investing heavily in battery storage incentive programs to accelerate energy resilience. These incentives often cover up to 30% of system costs, especially in 2025 with new funding rounds. Get help from BESS Australia to apply and install your system under a valid battery system government grant before funding runs out.

What is a New South Wales Battery subsidy?

A New South Wales battery subsidy launched on 1 November 2024, ties in the state's peak demand reduction scheme (PDRS) and installers must provide discounts based on conditional tradeable PDRS certificates.
