How much does an energy audit cost?

There are plenty of ways to make an energy audit easier on the budget. For example, the Inflation Reduction Act--which was signed into law in 2022--can cover up to \$150 of your energy audit cost (4).

How do I find an energy auditor?

Finding an energy auditor is probably easier than you think! Here are a few places to look: Local utility companies will often provide audits for free (although sometimes these audits are spot checks of specific kinds of energy usage, rather than full audits).

Where can I get an energy audit?

Here are a few places to look: Local utility companies will often provide audits for free (although sometimes these audits are spot checks of specific kinds of energy usage, rather than full audits). HVAC companies and home performance contractors can also usually do energy audits (for a fee).

What is an energy audit?

An energy audit is the process of figuring out how much energy your home is using and how you can make changes for better efficiency. During a professional energy audit, the auditor might perform a few tests to see where energy is escaping from or being wasted in your house:
