China installed a record 60 gigawatts of new solar capacity in the first quarter of 2025, with rooftop PV accounting for 60% of that total. New guidelines by the National Energy Administration...

These 1.8-gigawatt modules using advanced heterojunction technology will be installed at a 4-gigawatt solar power plant, which is located on the edge of China's largest desert, the ...

This globally pioneering initiative features 2,934 PV platforms installed using large-scale offshore steel truss platform fixed pile foundations. Each platform measures 60 meters in length and ...

These bases, a combination of vast solar arrays and wind farms, are to be connected to markets in eastern China through high-speed transmission lines. The projects take advantage both ...

So there is a lot of uncertainty in the Chinese solar industry, but there are also irrefutable facts: China needs to continue to expand domestic solar capacity to reach its climate target....

As part of the project, Sinopec will build a new photovoltaic power station with an installed capacity of 300MW and annual power generation of 618 million kilowatt-hours, an electrolyzed ...

The 277 GW of utility-scale solar capacity installed in China in 2024 alone is more than twice as much as the 121 GW of utility-scale solar capacity installed in the United States at the end of ...

China is often accused of building new coal-fired power plants. However, the growth in wind and solar energy is significantly faster.

China's solar energy production is reaching simply staggering levels, dragging energy costs down around the globe.

In 2024 alone, China installed 360 gigawatts (GW) of wind and solar capacity. That's more than half of global

Houcun installs solar power generation

additions that year, and it brings total installed capacity to 1.4 terawatts (TW) - ...
