Designed for cell towers, data centers, and network equipment, our telecom battery systems provide reliable backup power, optimize energy use, and reduce costs.

BIG has grown organically over the last two decades from a founder, to a family, to a force of 700. Our latest transformation is the BIG LEAP: Bjarke Ingels Group of Landscape, ...

At the foot of BIG HQ, BIG's Landscape team has transformed a former parking area into a 1,500 m² public park and promenade, inspired by the sandy beaches and the coastal forests of Denmark.

Bjarke Ingels - Founder & Creative Director, BIG The facade design is inspired by the punched windows seen in the historic warehouses of the Meatpacking and West Chelsea neighborhoods.

BIG (Bjarke Ingels Group) is a multidisciplinary design firm specializing in architecture, engineering, and planning with a focus on innovative and sustainable projects.

Meet the team at Bjarke Ingels Group (BIG). Explore our partners, architects, and specialists shaping the future of architecture and design.

The maximum output current of the system is 150A, when it is configured as N+1 back up, its max power is 9KW. If you don't configured it with N+1, the maximum output power is 12KW. The product ...

1.The batteries charge and discharge frequency is high, so we recommend to use Iron Lithium Battery. The advantages of Iron Lithium Batteries are: anti - high temperature (up to 55°C), high battery cycle ...

Designed by BIG-Bjarke Ingels Group with Atelier Verticale, CityWave is constructed on the last two plots of the CityLife masterplan, a major new business district in a prestigious area of Milan, within ...

How big is the battery required for a solar telecom integrated cabinet

Designed for remote locations, it integrates solar controllers, inverters, and lithium battery packs to ensure stable and continuous power for telecom equipment, surveillance systems, and off-grid ...

BIG has grown globally since 2005, with 60+ buildings in 10+ countries. Join our 700+ person team shaping the future of architecture and design challenges.

HUNTERHEX ® hybrid system for Telecom Applications Battery storage modular from 5 - 25 Kwh in 5 kWh steps. Each 5-kWh step require 3U height in cabinet. All based on LiFePO4 100Ah 19-Inch rack ...

Shaped by the movement of the water, the surrounding park is designed by BIG Landscape and manages storm surges through sloping terraces, vegetated dunes, and wetland gardens that slow ...

Select the right battery type and size based on your load, backup time, and operating conditions to maximize reliability and lifespan. Keep telecom cabinet batteries cool and well ...

Built in a rugged, insulated NEMA 3X enclosure and skid-mounted for easy siting, the MOBICELL-350 integrates solar panels mounted on the outside walls of the cabinet, a 20 kWh AGM battery bank, ...

Massive Energy Density: Offers a wide range of capacities from 100Ah (2.5kWh) up to an industry-leading 600Ah (30.72kWh) in a single cabinet, reducing the number of units needed for large systems.
