As of 2025, the France Energy Storage Systems Market is valued at a significant scale, with projections to reach USD 22,251 million by 2035, growing at a CAGR of 9.33% from 2025 onward.

Statistics from Enedis show that 4.2 GW of solar connected to France's grid in the January-September period, including 82 MW paired with storage, marking a slight decline from 2024.

By technology, solar photovoltaic held 100.00% of the France solar energy market share in 2025 and is expanding at a 18.84% CAGR through 2031. By grid type, on-grid systems ...

Market Segments: The European outlook shows strong growth in residential, commercial & industrial (C& I), and utility-scale batteries, with France ranking high in storage investment potential. Solar-plus ...

France Solar Energy Storage Market is projected to grow around USD 64.2 Billion by 2031, at a CAGR of 23.1% during the forecast period.

Listed below are the five largest energy storage projects by capacity in France, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a ...

In the first quarter of 2025, 1,407 megawatts (MW) of new capacity was added, followed by 1,358 MW in the second quarter, and a further rise to 1,507 MW in the third quarter, showing a ...

The exponential growth of the solar photovoltaic energy sector in France has never stopped since its inception in the early 2000s. In 2023, the PV energy capacity in France amounted to...

Find here the data on electricity generation in France, presented either in aggregate or in detail by generation type: nuclear, conventional thermal, hydro, solar, wind and renewable thermal.

How much solar energy storage is there in France

France is continuing its ambitious push into renewable energy, installing an impressive 4.2 GW of new solar capacity in the first nine months of 2025. This brings the nation's cumulative ...
