Who determines the final content of a solar PV solicitation?

Agency contract officers, attorneys, and engineers are responsible for determining the final content of any solicitation. Updated to the regulations, codes, and standards applicable to solar PV are changing frequently; it is the responsibility of agency managers to determine which guidelines (and which versions) apply. Figure 1.

What services are included in a solar PV contract?

The services included by the contractor shall include operation and maintenance of all components of solar PV systems for the life of the contract, as detailed herein.

What documents do you need to build a PV system?

Upon completion of construction, the Contractor shall submit final design documents, including, at a minimum, drawings that are updated to reflect all changes, with details of PV system structural support, any roof penetrations, electrical single-line diagrams, and complete product literature for review by the Government.

Why should you use a solar procurement template?

Save time in compiling the specifications section of a solar procurement. The template language can be used as a starting point from which agency managers can customize their own language. Act as a checklist so that agencies managers address key issues throughout the process, to ensure the project's best possible outcome.
