This state-of-the-art energy storage solution is designed to support India's clean energy transition and strengthen the reliability of country's power infrastructure.

India explores vanadium, zinc, and aluminum-air batteries to diversify storage beyond lithium-ion for grid resilience.

India's energy storage projects installation to surge 10-fold to 5GWh in 2026: IESA 29 Dec 2025

With the availability of substantial pile of aluminum resources, rising amounts of energy demand and visionary planning of Viksit Bharat @2047, India has a competitive edge in pursuing AIB innovation.

Battery energy storage systems (BESS) allow for energy storage in batteries for later use. India has committed to achieve 50 per cent of installed capacity from non-fossil-fuel-based sources by 2030.

Science News: Scientists in Bengaluru have invented a groundbreaking eco-friendly, foldable battery using aluminum, offering a safer and sustainable alternative to traditional lithium-ion batteries.

Also read: India Energy Week 2026 ends but sets the course for aluminium's green transition Financial support for the project will come through Viability Gap Funding under the Power System ...

In this blog, we'll explore the Top 10 Battery Energy Storage System Companies in India (2025), providing detailed profiles of each company along with their flagship projects, products, and features.

An Indian deep-tech startup is pioneering aluminum-air battery technology, offering a sustainable, domestically sourced alternative to conventional lithium-ion energy storage.

BSES Rahdhani Power Limited (BRPL) and Global Energy Alliance for People and Planet (GEAPP) together

India Aluminum Acid Energy Storage Battery System

have launched India's first ever commercial standalone BESS, expected to go live by March 2025.
