What is a vacuum solar panel lifter?

A vacuum solar panel lifter allows the operator to pick up panels in no time, quickly lifting and moving them in place with a simple grip on the ergonomic handle. Solar panel lifting that normally requires two people can easily become a one person job when implementing a UniMove solar panel lifter into your workflow.

Who can lift and tilt large solar panels?

Everyone can lift and tilt large solar panels, powered by vacuum technology. UniMove offers a solar panel lifter for every step of your processing operations. You can easily grip the solar panels with suction cups that have been designed for specifically handling this type of material.

What is a solar module lift?

This innovative tool enables you to lift solar modules to the roof with ease and precision, making installation faster, safer, and more efficient. With its compact design and simple operation, Module Lift is ideal for both residential and commercial solar installations.

What is a module lift?

With its compact design and simple operation, Module Lift is ideal for both residential and commercial solar installations. It eliminates the need for heavy lifting and reduces the risk of damage to the panels and the roof. Module Lift is a must-have tool for any solar panel installer looking to maximize efficiency and save time on every job.

PV Module Lift(TM) The Fluke Module Lift(TM) is designed to safely and quickly transport a PV module to a roof, streamlining the installation process of solar panels. This innovative tool enables ...
