-----  
Can solar panels be installed on a roof?

Solar panels are a popular choice for homeowners looking to reduce their carbon footprint and save on energy costs. However, installing solar panels on roofs can come with its own challenges and potential problems.

Do solar panels damage your roof?

While solar panels themselves will not inherently damage your roof, an improper installation can lead to problems down the line. It is crucial to ensure that the installation is done correctly by a professional, or with thorough research and proper planning if you choose to do it yourself.

What happens if solar panels are not installed properly?

Issues such as leaks, broken tiles, and structural damage can occur if the panels are not installed properly. To avoid roof damage, working with experienced installers who understand the intricacies of solar panel installation is essential. They will know how to secure the panels without compromising the integrity of your roof.

Do solar panels add weight to your roof?

Additional Weight Solar panels can add significant weight to your roof, so it is crucial to ensure that your roof can support the additional load. Before installing solar panels, it is essential to have a professional assess the structural integrity of your roof and determine its weight-bearing capacity.
