-----

Concentrating Solar Power Update NREL is moving to 100-kW demonstration in an ARPA-E-funded 100-hour thermal energy storage project in sand. The technology has a 95% round-trip efficiency, ...

Our analysis indicates that power purchase agreement (PPA) prices are not expected to decrease significantly in the foreseeable future. PPA tailwinds include record-low solar module prices ...

The total cost of a solar project depends on a variety of factors including, the size of the system, the types of solar panels being used, the complexity of the engineering design, and finally, the cost of ...

Renewables continue to prove themselves as the most cost-competitive source of new electricity generation. On an LCOE basis, 91% of newly commissioned utility-scale renewable capacity ...

These benchmarks help measure progress toward goals for reducing solar electricity costs and guide SETO research and development programs. Read more to find out how these cost benchmarks are ...

Regional Price Variations Are Significant: Solar PPA rates in 2025 range from \$0.08/kWh in Texas to \$0.25/kWh in high-cost markets, with the national average at \$0.15/kWh. Your location's ...

On average, construction costs for national gas plants have been lower than for wind or solar from 2013 through 2022. The increase in wind and solar construction costs in 2022 reverses ...

Zoning laws, permitting processes, and grid connection requirements all contribute to the overall financial burden of contracting solar power generation. Regions with streamlined approval ...

Average construction costs for solar generators increased by 1.7% in 2022, and for wind turbines they increased by 1.6%. These three technologies--solar, wind, and natural ...

## Is the cost of solar power generation contracting high

Solar power purchase agreements in the West were an average of \$10/MWh lower than in other regions. Larger utility-scale solar projects (20 MW+) cost 26% less per MW than projects ...
