Why are there no lights on my SolarEdge inverter?

If no lights are visible on the inverter, perform the following checks: Ensure the inverter's twist knob is set to the "ON" position. Verify that the solar breaker is flipped to the "ON" position. For installations with multiple SolarEdge inverters, check the subpanel to confirm all associated breakers are turned on.

How do you know if an inverter is working?

Inverters typically have a "Green" light to indicate that it is ON and a "Red" light to indicate a problem. The audible sound of the cooling fans running is another cue. The inverter lights indicator table below shows the various operating conditions and the indicator lights and cooling fan status.

How do I know if my SolarEdge inverter is working?

For additional information, visit the official SolarEdge support page: SolarEdge LED Guide. The front panel of your SolarEdge inverter displays a status light with three possible colors: If the blue light is not on, the system is not connected to the monitoring platform. Indicates the system is actively producing power.

What does a red LED on a solar inverter mean?

Any combination of LEDs on condition that the blue LED is on. Any combination of LEDs on condition that the green LED is on. Any combination of LEDs on condition that the red LED is on. Your inverter has a switch and three colored LEDs that indicate information such as performance and errors. Learn what they mean. | SolarEdge US
