Is there solar power in London

programmesFutureThe UK's annual insolation is in the range of 750-1,100 kilowatt-hours per square metre (kWh/m²). London receives 0.52 and 4.74 kWh/m² per day in December and July, respectively. While the sunniest parts of the UK receive much less solar radiation than the sunniest parts of Europe, the country's insolation in the south is comparable with that of central European countries, including Germany, which generates about 10.7% of its electricity from solar power

Discover how TfL's groundbreaking solar energy deal with EDF Renewables will power the London Underground, cut carbon emissions by 28,000 tonnes, and boost UK biodiversity and ...
