---

Polish renewables company R.Power is looking to develop 680 MW of standalone battery energy storage system (BESS) projects in Portugal in support of the government"s desire to ...

Lisbon-based Endesa subsidiary Newcon40 Unipessoal Lda is developing the Sol de Évora Photovoltaic Solar Plant which would include a 240.72 MW/481.44 MWh battery energy ...

Saft powers industrial and manufacturing sectors as well as connected smart cities, while providing back-up power sources in remote and inhospitable environments, such as the Arctic Circle ...

Key Insight: The newly launched Lisbon Battery Energy Storage Industrial Park positions Portugal as a leader in sustainable energy solutions, offering scalable storage systems to stabilize renewable ...

With 180 MW of power and 360 MWh of energy storage capacity, this project will be one of the largest BESS systems deployed in Europe integrated with a CCGT for grid connectivity.

Portugal"s electricity network is undergoing a quiet revolution. Investors are shifting from a race to install ever-larger solar fields toward a more nuanced goal: pairing panels and turbines with ...

The batteries will allow Galp to store the solar energy produced in periods of high generation, and to deploy it during periods of high demand, maximizing the energy"s value.

AFRI SOLAR - Endesa Generación Portugal, part of Enel Group, has been award the connection rights to develop a renewable energy project combining solar, wind, green hydrogen and a 168.6MW ...

Enter the Lisbon Energy Storage Peaking Power Station --a $220 million marvel that"s solving Portugal"s "energy rollercoaster" problem. Think of it as the country"s giant power bank, ready to juice ...

Carregado, Portugal. Designed to store and deliver over 3 000 TJ of renewable electricity over ten years, BESS is projected to save approximately 500 000 tons of CO2 emissions throughout its lifetime.
