Does Myanmar need a comprehensive energy plan?

Myanmar needs to establish a comprehensive integrated energy planto guide the development of the energy sector,including an energy efficiency labelling programme for energy service companies and appliances.

Should Myanmar use natural gas to supply electricity?

Natural gas-driven power stations contribute 40pc of Myanmar's electrical power(EPM No 1 figures). Economist and researcher Dr Maung Aung suggests that the country should rely on natural gas to supply regular electricityto help develop the industrial and production sectors.

Does Myanmar need a regional energy sector?

The Energy Sector has great potential for further regional collaboration. If Myanmar is able to enhance renewable energy production beyond local uptake,it could export energy to a number of neighboring ASEAN and other Asian countries through the use of „smart" regional grids.

How will electricity be supplied in Myanmar?

Electricity will be supplied for local use in accordance with the ratio of shares held by Myanmarin the joint-venture company. The agreement to set up this company is an important step in the implementation of the project. (BKK Post,18/12/02)
