What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

Is the energy storage mandate a big change?

This is a big change towards rationalization of renewables but hidden within that is a removal of the energy storage mandate," George Hilton, research and analysis manager at S&P Global, tells ESS News. S&P Global estimates that the storage mandate has driven between 50 and 75% of domestic demand.

How will the energy storage mandate impact China?

S&P Global estimates that the storage mandate has driven between 50 and 75% of domestic demand. With China accounting for around 56% of the global energy storage demand in 2024, the impact of such a policy change will be massive.

How will China promote the new-type energy storage manufacturing sector?

BEIJING, Feb. 17 -- Chinese authorities unveiled several measures on Monday to promote the new-type energy storage manufacturing sector, as part of efforts to accelerate the development of emerging industries and the country's modern industrial system.

China's new energy industry has ushered in an unprecedented "policy storm," which has also accelerated the transformation of the energy storage industry from "policy-driven" to "market ...

Depending on how energy is stored, storage technologies can be broadly divided into the following three categories: thermal, electrical and hydrogen (ammonia). The electrical category is ...

New renewable energy plants in China will no longer be required to build storage in order to secure development rights and grid connection. Since introduced in 2022, policy mandates ...

On February 9, China's National Development and Reform Commission (NDRC) and National Energy

New Energy Projects Mandatory Energy Storage

Agency (NEA) jointly published the Notice on Deepening Market-Based Reform of ...

Chinese authorities unveiled several measures on Monday to promote the new-type energy storage manufacturing sector, as part of efforts to accelerate the development of emerging ...

Imagine being forced to buy a bicycle with training wheels every time you wanted to ride - that's essentially what China's renewable energy sector endured with mandatory energy storage ...

In terms of storage types, the dominant advantage of lithium-ion batteries continues to expand, accounting for 97.4% of the new type storage installation. Other types, such as air ...

The complementary relationship between renewable energy and energy storage presents significant opportunities for the "Renewable Energy + Storage" mode. To address the flexibility ...

To facilitate the progress of energy storage projects, national and local governments have introduced a range of incentive policies. For example, the "Action Plan for Standardization Enhancement of ...

You know how people kept arguing about whether mandatory energy storage requirements were helping or hurting the industry? Well, the Chinese government just dropped a bombshell in February 2025 - ...
