New York - December 9, 2025 - According to BloombergNEF's 2025 Lithium-Ion Battery Price Survey, average pack prices have fallen to a record low of \$108 per kilowatt-hour, marking an 8% decline ...

Executive Summary In this work we describe the development of cost and performance projections for utility-scale lithium-ion battery systems, with a focus on 4-hour duration systems. The projections are ...

While the pace of price decreases has slowed, lithium-ion battery packs have reached a new record low in 2025. According to the latest analysis by BloombergNEF (BNEF), prices have ...

Battery pack prices for stationary storage fell to \$70/kWh in 2025, 45% lower than in 2024, marking the sharpest decline across all segments and making stationary storage the lowest ...

Lithium-ion battery prices dropped again in 2025, with average prices coming down 8% to \$108 per kilowatt-hour, according to BloombergNEF's annual price survey. China's lead in low ...

According to BNEF, battery pack prices for stationary storage fell to \$70/kWh in 2025, a 45% decrease from 2024. This represents the steepest decline among all lithium-ion battery use ...

The sustained decline in lithium-ion battery costs, particularly driven by LFP chemistry and manufacturing scale, is making energy storage more accessible and enhancing the return on ...

According to BloombergNEF's annual survey, battery prices in 2025 remained at \$108 per kilowatt-hour, an eight percent decrease. Experts also anticipate further price declines next year, ...

The price of battery packs has decreased by 75 percent in the last 10 years, as this energy storage technology has become increasingly important in the electric mobility and renewable...

# New Energy Storage Lithium Battery Price Trend

Lithium battery price in 2025 averages \$151/kWh, with EV packs from \$4,760-\$19,200. Prices keep falling due to tech advances and lower material costs.
