In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record growth in 2024 when power ...

Explore the top 25 BESS projects in the US and uncover the key players driving America's energy storage boom.

As of the end of May 2024, China has completed and put into operation new energy storage projects with an installed capacity of over 38 million kilowatts, with an average energy storage time of up to 2.2 hours.

The pilot project will be installed at SRP's Copper Crossing Energy and Research Center in Florence, Arizona and sell capacity to SRP under a ten-year energy storage agreement.

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage solutions ...

In the second quarter of 2024, US developers put into operation 33 energy storage projects in 10 states with an installed capacity of 2.9GW. The cumulative installed capacity of energy storage in the United ...

California now has nearly 17,000 megawatts of battery storage -- one-third of the way to its 2045 goal -- transforming how the state powers a reliable grid and robust economy, while proving that climate ...

China has brought into commercial operation what is purported to be the world's largest compressed-air energy storage (CAES) facility in Jiangsu Province, marking a significant milestone for long ...

Accelerated by DOE initiatives, multiple tax credits under the Bipartisan Infrastructure Law and Inflation Reduction Act, and decarbonization goals across the public and private sectors, energy storage will play a ...

New energy storage projects put into operation

The project is expected to avoid 419 million pounds of GHGs annually, which is equivalent to removing 44,000 gas-powered cars from the road for one year or planting 3.1 million trees and growing them ...
