Sizable Energy, a climate-tech startup headquartered in Milan and Palo Alto, has raised US \$8 million for the development of its offshore pumped-hydro storage system. This is an innovative ...

Deals relating to energy storage increased significantly in the offshore industry in H1 2022 In the first half of 2022, the number of deals relating to energy storage increased significantly - by 120% from...

Welcome to the home of the Offshore Renewable Energy Storage project at MIT. As part of the Precision Engineering Research Group (PREG), We are developing a new type of pumped hydro ...

By integrating storage systems into offshore wind farms, the project supports the development of next generation of offshore wind farms into advanced, multi-faceted energy hubs combining wind, energy ...

Several major energy industry players, such as RWE, Vattenfall, and the Dutch research organisation TNO, are part of this three-year initiative, which aims to accelerate the development and ...

As the ambitions of offshore energy companies to explore deeper, more remote offshore waters grow, so does the need to prioritize the development of safe, cost-effective, and reliable ...

Taking into account the rapid progress of the energy storage sector, this review assesses the technical feasibility of a variety of storage technologies for the provision of several services at ...

With our new subsea energy storage system, based on our membrane-based storage solution for oil and chemicals, you can now store liquid clean energy, such as ammonia or e-methanol, directly on the ...

Storing the energy created from renewable sources is essential to create a successful transition. The development for offshore energy storage technologies is underway and they stand to make an ...
