-----

Increased production of power from wind turbines can allow Norway to curtail its domestic production of hydroelectricity (stopping hydro turbines), which due to being dispatchable is a valuable asset in the ...

A group of researchers from Norway's Institute for Energy Technology (IFE) and Sweden's Uppsala University has outlined a new strategy to retrofit wind power plants in hybrid...

Equinor has started commercial power production at its first hybrid power complex that combines wind and solar resources.

Energy systems can reduce pollution and energy consumption when they combine with various renewable resources (e.g., wind, solar, geothermal) and energy storage systems (e.g., ...

Integration with other countries' power systems, the well-developed power grid and the characteristics of hydropower production make Norway's power supply system very flexible, reducing ...

In a significant move for the renewable energy sector, Norwegian energy giant Equinor has announced the start of operations for its first-ever solar and wind hybrid power plant.

Store Norske Energi, a state-owned energy company based in Longyearbyen, is testing whether solar energy could be used to transition Spitsbergen to emissions-free, hybrid energy.

Wind-solar hybrid systems represent a breakthrough in renewable energy technology, combining the complementary strengths of solar photovoltaic panels and wind turbines to deliver ...

Scatec, a Norway-based renewable energy developer, will develop the "world's first" hybrid solar and hydropower plant based on floating solar power technology with integrated battery system.
