What is the IEA PVPS trends in photovoltaic applications 2025 report?

The IEA PVPS Trends in Photovoltaic Applications 2025 report provides comprehensive data and analysis on global PV deployment, technology, and market evolution from 1992 to 2024. It supports policymakers, utilities, and industry stakeholders in understanding key market drivers and future developments.

What is the growth rate of the photovoltaic market in 2025?

The general trend towards electrification of heating, transport and industry creates additional demand for renewable electricity, including solar. The annual growth rate of the photovoltaic market is expected to be around 20% for 2025.

What drives the growth of PV installations?

The electrification trend of our energy use, which includes heating and transport as well as the production of hydrogen and related products from renewable energy sources, together with the overall need to provide CO2 free energy, are the drivers behind the continuous growth of PV installations.

What happened to solar photovoltaics in 2024?

The global installed solar photovoltaic capacity exceeded 2.2 TWp at the end of 2024, doubling in less than three years. The number of countries installing 1 GWp per year or more has increased to 36. After the 2022 price spike for solar photovoltaic hardware and battery storage, prices in both markets continued to decrease in 2024.

The number of countries installing 1 GWp per year or more has increased to 36. After the 2022 price spike for solar photovoltaic hardware and battery storage, prices in both markets continued to ...

In 2024, the EU output of photovoltaic electricity accounted for 11% of the EU's gross electricity output, according to Ember. Continued growth in the solar energy sector is expected in the coming decades, ...

This Commission department is responsible for the EU's energy policy: secure, sustainable, and competitively priced energy for Europe.

The global market size for Photovoltaic Square Brackets was valued at approximately USD 4.5 billion in 2023

Photovoltaic brackets will be put into mass production by the end of the year

and is projected to reach around USD 12.8 billion by 2032, growing at a robust CAGR of 12.4% ...

The targets have evolved consistently since first established to help the EU reach its ambitious energy and climate goals.

Global photovoltaic bracket market was valued at USD 895 million in 2024 and is projected to reach USD 1623 million by 2032, at a CAGR of 9.1% during the forecast period.

The Photovoltaic Bracket market size, estimations, and forecasts are provided in terms of output/shipments (K Units) and revenue (\$ millions), considering 2024 as the base year, with history ...

Discover the booming global photovoltaic bracket market! This in-depth analysis reveals a \$5 billion market in 2025 projected to reach \$15 billion by 2033, driven by renewable energy adoption ...

The charter sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

The renewable energy directive is the legal framework for the development of renewable energy across all sectors of the EU economy, and supports cooperation across EU countries.

Photovoltaic Bracket Market Size was estimated at 5.3 (USD Billion) in 2023. The Photovoltaic Bracket Market Industry is expected to grow from 5.68 (USD Billion) in 2024 to 9.98 ...

The European Solar Charter, signed on 15 April 2024, sets out a series of voluntary actions to be undertaken to support the EU photovoltaic sector.

In 2023, the solar photovoltaic sector in the EU and globally saw the prices of the panels plummet from ca. 0.20 EUR/W to less than 0.12 EUR/W. This unsustainable situation is weakening ...

Solar energy is one of the world's most abundant and easily accessible sources of renewable power. But how well do you know it? Several distinct technologies harness the sun's ...

The revised Energy Performance of Buildings Directive will speed up the uptake of solar photovoltaics and solar thermal - both on residential and non-residential buildings - and increase the possibilities ...

It will become a large-scale new energy equipment manufacturing base in Southwest China, positioned to be based in Yunnan, radiate to Southwest China, and face South and Southeast ...
