The capital is expected to serve as the company's principal funding source for utility-scale energy storage and hybrid renewable projects expected to reach commercial operation through ...

RayGen is proposing to build a fully dispatchable renewable energy facility that will use their innovative concentrated solar PV technology known as PV Ultra and combine it with their ...

This project is one of the key agricultural photovoltaic power generation projects in Wanning City, making full use of the local barren slopes and abundant solar energy resources, transforming natural ...

A framework for the "development, utilisation and commercialisation of energy storage systems" in the Philippines has been passed by the House of Representatives.

Recently, the world's largest photovoltaic (PV) and energy storage project was awarded to a consortium including several Chinese companies. The USD6 billion project in Abu Dhabi is being ...

In early June, Greentown Company, a subsidiary of Lin-gang Group, announced the construction of Shanghai's first large-scale industrial and commercial solar-plus-storage microgrid ...

Once built, DCEP will be the largest battery energy storage system in the world, highlighting California's leadership in clean energy innovation and infrastructure.

Searchable directory contains 100s of resources to understand the issues throughout the renewable energy project development process.

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

Photovoltaic energy storage new energy project development

The loan guarantee will finance the deployment of up to 1,000 solar photovoltaic (PV) systems and battery energy storage systems (BESS) located primarily at commercial and industrial ...
